outdoor kitchen

BEYOND THE KITCHEN.
BEYOND SPACE.
BEYOND ALL EXPECTATIONS.

History

Born during a time when spaces seemed to shrink – in the heart of a lockdown – Kioo is the result of a simple idea but revolutionary: transforming every corner outdoors into a place of sharing, beauty and freedom.

It's from an old ironing board and a camping stove that has born the first inspiration. A kitchen made of ingenuity, passion and desire to live without limits. A kitchen covered by the tarp of a Vespa for brave the rain, and which would soon embody the brand's founding values: innovation, elegance, sustainability and functionality.

Today Kioo is synonymous with high-end design and premium materials, modular and refined solutions that adapt to every space, creating a harmonious dialogue between inside and outside.

—

Kioo offers much more than one product: it offers a lifestyle, an authentic and personal way of experiencing the outdoors. Personalization becomes part of the experience, thanks to a intuitive e-commerce platform that allows you to configure every detail – materials, colors, accessories – and receive in a few clicks a clear, comprehensive and tailor-made proposal.

Treatment continues even after purchase, with consultancy services, assistance and an evolved platform that supports the customer over time. All wrapped up in elegant, sustainable packaging, designed to make unboxing time a premium experience too.

Choosing Kioo means bringing cooking to the center of life without borders. It means choosing beauty, quality and innovation. It means living beyond.

A woman with voluminous, curly brown hair is shown in profile, looking out over a scenic landscape. She is wearing an orange t-shirt and a dark apron with green straps. The background features a calm lake, distant mountains, and lush green trees. Two terracotta pots with purple and yellow flowers are visible on a ledge in the foreground. The overall atmosphere is peaceful and natural.

A SINGLE SUPERFICIAL, INFINITE POSSIBILITIES:

HPL-integrated tanks redefine functional elegance. The integrated tub squared in HPL, available in finishes coordinated with the plan, they offer an aesthetic refined uniform.

With stainless steel bottom, ensure functionality and visual harmony in every outdoor kitchen.

DISAPPEARING FAUCET , WHEN DESIGN IT'S DISCRETION.

The Schock retractable faucet with finish PVD combines aesthetics and innovation. High barrel mixer and knob with machining diamond, and removable hand shower.

LIGHT AS AIR , STRONG AS ALUMINUM: THE DOOR THAT SIMPLIFIES EVERY MOVEMENT.

The Light door is made up of a double shell in aluminum and an ultralight internal technical panel. This combination guarantees maximum robustness with minimal weight, reducing stress on the hinges and improving the smoothness of opening. It remains fixed at the back.

EVERY SIDE TELLS THE SAME STYLE: COORDINATED PANELS FOR A 360° DESIGN.

For a uniform and refined aesthetic, it is possible to add panels to the sides of the outdoor kitchen. These panels take up the same finish of the front doors.

PLACE, CONFIGURE , SIMPLIFY: YOUR KITCHEN FITS YOUR SPACE AND TO YOUR NEEDS.

During online setup, you can choose the ideal positioning of your outdoor kitchen: in the center of the garden or close to a wall. Depending on your choice, you can leave the rooms open rear to facilitate access to hydraulic connections and when the gas cylinder is inserted, optimizing functionality and convenience.

ACCOYA: THE WOOD THAT RESISTS TIME , TO NATURE AND CHALLENGES.

the wood that guarantees resistance, hygiene and beauty. Durable surfaces, suitable for use food and designed to defy time and the weather: no mold.

Tear and weather resistant: ideal for use in all seasons.

FINISHES

STRIPS

Accoya's timber comes from sustainable forests and is processed using a non-toxic process. Its properties are superior to those of the best tropical hardwoods and make it capable of manage the most difficult projects, even those currently considered only feasible with materials from non-sustainable sources.

Since acetylated wood is less sensitive to water, its "movements" and sensitivity are also to biological aggressions (lignivorous fungi in particular) are appreciably reduced.
